It's our view that in this case, because of the legal allocation of the burden of proof, that certain burdens are on Mr. James rather than

Howard and Company, where you indicate you worked from 1972 to 1976, is it correct you worked on only two offerings registered under the Security Act of 1933 while at Howard and Company?

MR. LEWIS: Object to the form and foundation.

THE WITNESS: That's a good question. There are two I can recall specifically, one which may not have been completed at the time, if I recall correctly. That might be correct.

One of the services we provided was advisory in nature to companies considering going public. In the course of that, I did a lot of research and we had quite a number of

the lead or co-lead managing underwriter, actually, and there were a number of other deals of that type on which I worked where we were not either lead or co-lead or where we were not taking primary role in 5 that function. I think that's probably an accurate 6 number. 7 Q. Only one of those was an initial

public offering of stock; is that your recollection? MR. LEWIS: Objection to the form. THE WITNESS: One of the three was an IPO of -- was actually stock and warrants, which made up a unit at the time.

Technically, the offering was of units.

That's the one I'm thinking of. Q.

Of the three, yes. Of the others, I Α. do believe there were other IPOs in that list.

A. No, I just recall vaguely having some conversations within the firm of the type that would have more likely applied to an IPO than another type of an offering; no.

Turning the page of Exhibit-334, your time at Philadelphia Capital Advisors, which was 1980 to 1983, you didn't work on any public offerings

as I said, it was part of the study that I did at that time and there was fairly intensive -- we wrote about just about every aspect of that study over a period of years. I'd be surprised if it was not covered in something we did but, again, the focus at that time from our point of view was more on the prospective issuer than on the underwriter, although we did cover all the participants in the process. Q. I'm just going to do this hypothetically to find out whether I can understand what you are saying.

Assume that there's a prospectus that's defective, it has a misstatement or an omission in it, a material misstatement or omission, and also assume that the underwriters have conducted a reasonable due diligence investigation where they've identified an issue, and they actually believe and have reasonable grounds to believe that the registration statement and prospectus are complete and accurate, don't have any material misstatements, don't omit any material facts; you do recognize, I take it, that in that circumstance the underwriters are

MR. LEWIS: Objection to form. THE WITNESS: It's probably correct with respect to all of it.
